

PROJECT

Green Cola

DISPLAY STANDS

Precision Crafted. Built to Perform.

Tasty, original but most of all refreshing!
Green Cola is a new proposal for Cola, addressed to all, even to those with special dietary habits (eg diabetics) looking for a product with minimal caloric cost, without sacrificing the taste result.

Stevia instead of sugar?

Indeed!

Stevia reduces energy intake, contributing positively to the effort to control weight and prevents the development of caries.

The well-known Green Cola, with a continuous consumer awareness increase, both in Greece and abroad, has already created its own customer loyalty base.
